

PRESS RELEASE**TCSJOHNHUXLEY AND VIDEOBET DEBUT BLING™**
SERVER SUPPORTED GAMING AT ICE 2008

TCSJOHNHUXLEY and Videobet are pleased to announce the signing of an agreement to distribute the Videobet BLING™ server supported gaming machine.

Videobet is a world leader in server supported and server based gaming systems.

BLING™ consists of modular products that offer traditional slot, multi-game and cross-platform opportunities. BLING™ allows operators to choose from the wide variety of premium quality game content, ranging from virtual table games such as Roulette and Blackjack, Video-Poker, Casino-Slot, Arcade, Bingo and more.

BLING™ is available in the new Midas cabinet (manufactured by Unicum Gaming), as a single or multi-game package. Through the use of Videobet's Reload™ facility, Videobet can convert existing cabinets into fully operational BLING™ gaming machines.

The BLING™ gaming machine is equipped with Videobet Server Supported Ready technologies, this allows easy switching from a fully stand alone configuration to the full Videobet server-supported configurations with no requirement for any additional software installation. The server-supported configured machine features automatic download of new game content, centralized reporting, monitoring, settings and connection to online networks for additional features utilizing the BLING™ Cross-Platform System.

The BLING™ Cross-Platform System enables casino operators to provide the same land based games, WinAJackpot.com progressive and live games networks to their players via mobile phones and at home via the web. In addition, BLING™ Portable allows players to play from anywhere in a venue via a light weight portable tablet.

David Heap, **TCSJOHNHUXLEY** CEO commented: *"We are very pleased to announce our co-operation with Videobet and to introduce at ICE 2008 their latest innovation to the industry. We are confident that BLING™ will attract interest from gaming operators across all markets and territories. The combination of **TCSJOHNHUXLEY** with its worldwide distribution and support network and the advanced technology offered by Videobet will lead to the deployment of many server supported and server based systems".*

Shmuel Weiss, Videobet CEO commented: *"we are excited about the future of this venture. We found in **TCSJOHNHUXLEY** an excellent partner with a history of proven success in the worldwide gaming distribution. We believe that together with **TCSJOHNHUXLEY** we can bring to the industry better availability of the exceptional and versatile BLING™ product.*
