

What sets Big Bang Blackjack apart?

Powered by GFL Bonusing, Big Bang Blackjack is an exciting new progressive side-bet.

Game Overview

Powered by Gaming Floor Live Bonusing, Big Bang Blackjack is a new exciting side-bet from TCSJOHNHUXLEY. With jackpots linked with other Big Bang Blackjack tables around the casino floor, jackpots increment at a faster rate, exciting players and creating a positive buzz throughout the entire casino.

Big Bang Blackjack has highly customisable jackpots designed to suit a casino's unique needs. Operators can customise contribution ratios and choose fixed percentage payouts that satisfy their players as well as their specific casino goals.

In Big Bang Blackjack, all jackpots increment when a bet is placed, but only the winning jackpot 'resets'. This means that if one jackpot is won, the other jackpots remain in play and continue to increment until they are also won; jackpots can grow to be even larger and more exciting for players than ever before.

How To Play

1. Big Bang Blackjack wagers may only be placed if a regular Blackjack bet is also made.
2. All Big Bang Blackjack wagers must be made prior to the first card of each round being dealt, by placing a chip on the flashing bet sensor.
3. Before the game commences, the Dealer will 'lock-in' the Big Bang Blackjack bets on the flashing bet sensors, removing the side bet chips. This will leave the bet sensor illuminated for all participating players.
4. The Mystery Jackpot may then trigger, randomly selecting a locked-in participant as the winner. The Big Bang Mystery Jackpot payout will occur immediately, if a winner is selected.
5. The game commences with the first two cards being dealt according to standard Blackjack procedures.
6. Any winning side bets are then paid out according to the value of the jackpot at the time of gameplay (paytable on reverse).
7. Dealer will continue with standard Blackjack gameplay according to regular procedures.

Features & Benefits

- A simple and fun progressive
- Easy for players and dealers to understand
- Little effect on game speed
- Advanced LED bet sensor technology
- Powered by GFL Bonusing
- Incremental jackpots that excite players
