Features & Benefits

- A simple and fun progressive
- Easy for players and dealers to understand
- Little affect on game speed
- Advanced multicolour side bet technology
- Powered by GFL Bonusing
- Incremental jackpots that attract players

Game Overview

Casino Hold'em Poker Plus from TCSJOHNHUXLEY is an exciting new side-bet for the base game, Casino Hold'em Poker, that does not change the dynamics of the game.

To play, all the player has to do is place an additional wager on the colour changing LED bet sensors located above the Ante. To win, a player must hold one of five Poker hands - that's it!

In Casino Hold'em Poker Plus the top three jackpots increment when a bet is placed and 'reset' once won. If one jackpot is won, however, the others will remain in play (don't reset) until they're also won.

This means that players have an increased chance of winning since lower hands, such as a Four of A Kind or Full House, can end up being worth the most!

How To Play

1. Two cards are dealt facedown to players who Ante, as well as to the dealer. Another three 'community cards' are dealt faceup.

2. Each player must either fold or stay in the game by making a Call bet, which is double his/her Ante.

3. Two more community cards are then dealt and the dealer exposes their two cards.

4. Each player and dealer will make the best five-card Poker hand using any combination of their own two cards and the five community cards.

5. Dealer qualifies with a Pair of 4s or better. If the dealer doesn't qualify, the Ante bet will pay according to the AnteWin payable. The Call bet will push.

6. If the dealer does qualify and the Player wins, the Ante bet will pay according to the Ante Win payable and the Call bet will pay 1-to-1. If the Dealer wins, the Player loses all bets. If there's a Tie, the bets will push.

Perfect for GFL Bonusing

GFL Bonusing presents casino operators with the option to offer both mystery and event-based progressives and jackpots.

Event-based progressives and fixed value jackpots are awarded as a result of a game-specific winning outcome, such as a Royal Flush in Poker. Operators can control jackpot contributions and output triggers, among many other pre-defined options to enable either large prizes with low hit frequency, more frequent small prizes, or a mixture of both.

The system has the ability to add mystery jackpots that use a random number generator (RNG) to select participating player(s) as the winner(s). Operators can control the average value and frequency of their mystery jackpots. This option can be enabled or disabled depending on regional regulatory restrictions.

Casino Hold'em Ante Win Pay Table

Hand	Payout
Royal Flush	100 to 1
Straight Flush	20 to 1
Four Of A Kind	10 to 1
Full House	3 to 1
Flush	2 to 1
Straight or Lower	1 to 1

Casino Hold'em Plus Pay Table

In the event that more than one player has any of the three progressive jackpot combinations in the same hand, the jackpot will be shared equally between players with the qualifying winning combinations.

Casino Hold'em Plus Pay Table

Hand	Payout
Straight Flush	Top Progressive
Four Of A Kind	Second Progressive
Full House	Third Progressive
Flush	50 to 1
Straight	10 to 1
