

HOW TO PLAY

BIG BANG BLACKJACK

TCSJOHNHUXLEY

An exciting new progressive jackpot side bet available for Blackjack!

Big Bang Blackjack is an exciting and easy new progressive side bet, which gives players a chance to win one of three different jackpots.

Simple & Easy

Big Bang Blackjack is extremely easy to play. All that's required of the player is to place a side bet, in addition to a regular Blackjack bet, on the flashing bet sensor located in front of the bet box.

Three Jackpots To Win!

Players who choose to participate in the Big Bang Blackjack side bet have a chance to win 1 of 3 different jackpots. The top progressive jackpot is the Big Bang Mystery Jackpot, which is triggered to randomly pick a winner from any player who has participated - i.e. placed a valid Blackjack bet and Big Bang Blackjack side bet. The second jackpot is won by any participating player who is dealt a perfect Blackjack (Ace & Jack of Clubs), and the third jackpot is won by any participating player who is dealt a suited Blackjack in his or hers first two cards (excluding Ace & Jack of Clubs).

Increased Chances of Winning Big

The three jackpots in Big Bang Blackjack increment when a bet is placed and 'reset' once won. If one jackpot is won, however, the other jackpots remain in play until they're also won. This means that players have an increased chance of winning bigger jackpots!

How To Play Big Bang Blackjack

1. Big Bang Blackjack wagers may only be placed if a regular Blackjack bet is also made.
2. All Big Bang Blackjack wagers must be made prior to the first card of each round being dealt, by placing a chip on the flashing bet sensor.
3. Before the game commences, the Dealer will 'lock-in' the Big Bang Blackjack bets on the flashing bet sensors, removing the side bet chips. This will leave the bet sensor illuminated for all participating players.
4. The Mystery Jackpot may then trigger, randomly selecting a locked-in participant as the winner. The Big Bang Mystery Jackpot payout will occur immediately, if a winner is selected.
5. The game commences with the first two cards being dealt according to standard Blackjack procedures.
6. Any winning side bets are then paid out according to the value of the jackpot at the time of gameplay (paytable on reverse).
7. Dealer will continue with standard Blackjack gameplay according to regular procedures.

Big Bang Blackjack Paytable

Winning Outcome	Paytable
Mystery Jackpot	Top Progressive Jackpot
Perfect Blackjack <i>(Ace & Jack of Clubs)</i>	Second Progressive Jackpot
Any Other Blackjack Combination	Third Progressive Jackpot

Big Bang Blackjack uses the GFL Bonusing system to run the mystery and event-based progressive jackpots. To find out more about Big Bang Blackjack and GFL Bonusing visit our website:
