

HOW TO PLAY

TCSJOHNHUXLEY

Casino Hold'em Poker™ uses the concept of Texas Hold'em Poker but allows the player to play against the house.

Texas Hold'em Poker is the most popular poker card game in the world. Quick to learn and popular with both beginners and expert players, it provides an enjoyable alternative to existing poker games.

AA Bonus Side Bet

Casino Hold'em gives the player the opportunity to play against the casino plus offers the optional AA-Bonus side bet.

Receive a pair of Aces or higher to win this Bonus. It pays out if the player receives a winning pair using their first two cards and the three card Flop.

Why It Works

The dramatic increase in popularity of Poker over recent years has created a large player base for card rooms worldwide.

The game is quick and easy to understand for dealing staff and players. It provides a good return for players allowing them to recycle their 'buy in' whilst still providing a good theoretical edge for the house.

Developed by Texas Hold'em players and endorsed by many of today's leading Poker players it is a firm favourite with players. Casino Hold'em Poker also boasts a successful track record in land based and online casinos.

How To Play

Casino Hold'em is played with one standard deck of fifty two cards (Jokers not included).

The individual cards are ranked in descending order as: A, K, Q, J, 10, 9, 8, 7, 6, 5, 4, 3, 2

- 1: Players place a bet in the "Ante" box and an optional side bet in a box marked "AA".
- 2: The dealer then deals two cards (face down) to each player and two to themselves. In addition three community cards are dealt face up in the middle of the table. The first three of five community cards are called the "Flop".
- 3: Each player then decides whether to continue by placing a further bet, which must be double the "Ante" in the "Call" box, or to "Fold" (i.e. to pass and lose the "Ante" and any "AA" bet).
- 4: After all players have decided, any winning AA Bonus bets are paid according to the pay table.
- 5: The dealer then deals the last two community cards face up, and exposes their two cards.
- 6: Each hand (the dealer's and each of the players) shall be scored according to the best five-card stud poker hand that can be composed out of the five community cards and with the two personal cards.
- 7: The dealer must have a pair of 4s or better to Qualify.
- 8: If the dealer does not Qualify; The "Ante" is paid according to the Ante winning pay table with a push on the "Call" bet.
- 9: If the dealer Qualifies; the dealer will compare his best hand against the player's best hand.
- 10: If the dealer and the player have exactly the same hand the bet is a "Push".
- 11: If the dealer beats the player then the player will lose both "Ante" and "Call" bets.
- 12: If the player beats the dealer then the "Ante" is paid according to the Ante winning pay table and the "Call" is paid 1 to 1.
