Suited to a range of games

The 23" e-FX™ Display from TCSJOHNHUXLEY is available in either a portrait or landscape orientation to suit a range of game types including Punto Banco, Sicbo, Baccarat, Money Wheel and Craps.

A number of attractive options and capabilities

With several colour finishes, including silver, gold and black, the 23" e-FX™ Display offers flexibility, with numerous optional toppers including a security camera or additional 10" promotional display.

Fully Integrated with Gaming Floor Live Media

The 23" e-FX™ Display has the option of being provided as a standalone solution or as a fully integrated networked display which benefits from the power of the Gaming Floor Live Media modules.

Centralised Real-Time Display Control

The GFL Media module enables real-time alteration, scheduling and configuration of display content from one central point. This not only prevents operators from having to manually change the content of each individual screen on their gaming floor, but also permits them to respond quickly to changing customer and casino needs. From immediately modifying table min/max's to instantly displaying a message about the latest bar specials, operators can now alter display content quickly and easily in real-time.
