Compatible with TCSJOHNHUXLEY products and some third-party Shoes and Shufflers

Available as a standalone display or networked solution benefiting from the Gaming Floor Live Media module

A number of attractive options and capabilities

With attractive Ticket Tape Text capabilities, optional toppers including security cameras or a 10" promotional display and available as a single or double-sided display, the 29" e-FX™ Display is a flexible display option made bespoke to your needs.

Fully Integrated with Gaming Floor Live Media

The 29" e-FX™ Display has the option of being provided as a standalone solution or as a fully integrated networked display which benefits from the power of the Gaming Floor Live Media modules.

Centralised Real-Time Display Control

The GFL Media module enables real-time alteration, scheduling and configuration of display content from one central point. This not only prevents operators from having to manually change the content of each individual screen on their gaming floor, but also permits them to respond quickly to changing customer and casino needs.

From immediately modifying table min/max's to instantly displaying a message about the latest bar specials, operators can now alter display content quickly and easily in real-time.

Customisable to your casino's style

With various colour finishes including silver, gold and black the 29" e-FX™ Display can be customised to fit your casinos individual style.
