

## What sets the TCSJOHNHUXLEY Blaze Roulette Table apart?

Blaze for Roulette takes roulette tables to the next level, with an LED lightbox beneath the game surface which allows you to display eye catching animations, game status prompts and winning numbers.

### Features & Benefits

Displays eye catching animations

Available in Single or Double Zero

Slimline acrylic or cloth layout gaming surface

Highlights winning numbers which assists players and dealers

Quick and easy to install

Excites and entertains new and existing players alike

TCSJOHNHUXLEY hold the global patent for displaying animation on the gaming surface

Low maintenance, long-life LEDs

LCD touchscreen dealer console

Easy to operate; little training required

Compatible with all TCSJOHNHUXLEY Roulette Wheels and the e-FX™ Display range

### Blaze Roulette Dealer Operations

Blaze Roulette is fully automated. The only manual operation the dealer needs to complete is if the game needs to be voided for any reason. Voiding the game is done through a dealer console similar to other Blaze games. Winning numbers are passed to the Blaze system and e-FX™ Display directly from an integrated Saturn™ Roulette Wheel, TCSJOHNHUXLEY reader head or connection to a third-party wheel.

### Energy Efficient

Unlike traditional illuminated tables - which consist of a light box with individual light bulbs that require regular replacement - Blaze LED Surface Technology is energy efficient and offers thousands of hours operating life. This means that game play is uninterrupted and regular maintenance is limited.

### Create the winning combination

Blaze and the Saturn™ Glo Roulette Wheel make a winning combination, lighting up your gaming floor with their automated and synchronised colour changes which clearly indicate attract mode, 'Place Your Bets', 'No More Bets' and specific winning numbers. Compatible with all TCSJOHNHUXLEY Roulette Wheels and the e-FX™ Display range
