

## What sets the TCSJOHNHUXLEY Saturn™ Auto Diamond Rotor Wheel apart?

The Saturn™ Auto Diamond Rotor Wheel provides the perfect automated solution for operators with a unique design that produces a wider variation of bounce as the ball travels around the wheel.

### Features and Benefits

Unique design that produces an increased ball bounce
Optional extra to the standard Saturn™ Auto Roulette Wheel
Can be supplied as an upgrade to existing Saturn™ Auto wheels as a factory fitted item.
Same footprint as the Saturn™ Wheel
Patented ball launch system
Easily integrates with third-party ETG systems
Built-in LED lights to indicate game status
Quick and easy change between three operation modes - Remote (system driven), Automatic and Manual
Available in single, double and triple zero options
Master craftsmanship design and build with over 130 quality control checks

### Unique Design

The Saturn™ Auto Diamond Rotor incorporates all the features of the existing Saturn™ Auto wheel as well as an exciting additional option that not only provides a striking design but also produces a wider variation of bounce as the ball travels around the wheel. This increased bounce is due to the Diamond Rotor's unique design, that builds anticipation and excitement as players wait for the winning result. The Diamond Rotor is an optional extra to the standard Saturn™ Auto Roulette Wheel and can be supplied as an upgrade to existing Saturn™ Auto wheels as a factory fitted item.

### Built-in LED Lights

With stunning built-in LED Lights, the Saturn™ Auto Diamond Rotor's eye-catching visuals and prompts help to heighten the game experience. The auto's three discreet sensors and LED lights combine to indicate game status, including: 'New Betting Sequence', 'Finish Betting' and 'No More Bets'.

### Compact Design

Unlike other automated Roulette wheels that require a bulky podium to house large technical equipment, the Saturn™ Auto Diamond Rotor is uniquely compact. Thanks to this distinct design, it can sit on an existing Roulette table, integrate into furniture (supplied without wheel covers) or be displayed on a bespoke, stand-alone podium, providing flexibility for any gaming floor.

### A Flexible Automated Solution

With its compact table top design and three operating modes, the Saturn™ Auto Diamond Rotor wheel is the perfect partner for use with Qorex Electronic Gaming Terminals or third-party EGT's as well as online gaming settings. The Remote setting allows for connected devices such as EGT's to control when the spin is started, while the Automatic setting configures the set number of spins per hour. Finally, the Manual setting allows for dealer interaction through a dedicated ball 'fire' button.

## Let's get technical

Diameter	832mm
Bowl with feet	225mm
Shipping Height	690mm
Shipping Width	960mm
