

What sets the TCSJOHNHUXLEY Qorex Terminal apart?

The Qorex Electronic Gaming Terminal features unrivalled configuration and customisation options to suit your casinos size and style, whilst offering stunning graphics on an easy to navigate, touch screen user interface.

Features and Benefits

23" or 27" HD capacitive touch screen displays

Multiple game functionality

Helps maximise live game play whilst providing social distancing

Configurable multi-colour LEDs

Easily configurable for various Player Tracking and SAS Systems, Bill Validators and Ticket Printers

Ergonomic arm rest and adjustable levelling feet

Illuminated rear panels - can be customised

Option for integrated USB charging points, LED rear panels and drinks shelf

Configure to any Casino Floor

The Qorex terminal has an ergonomically designed cabinet featuring a wide-screen 23" or 27" HD display with LEDs, which can be used to denote the price of play or customised to a casino's colour scheme providing an eye-catching addition to any gaming floor. With its modular design, Qorex terminals can be networked and configured anywhere on the gaming floor, from as little as one electronic terminal to innovative carousel arrangements and large-scale stadium set ups.

High Definition Graphics and Intuitive Interface

Stunning high definition graphics coupled with a player friendly interface provide players with simple yet easy to read prompts and game information, along with many useful features such as Repeat Bet, Double Bet and Remove All Bets / Last Bet. Qorex Terminals can be connected to cameras located on gaming tables to show the player live feeds of the game. This includes live feeds of Roulette Wheels, Card Shoes and even Dice Shakers. Switching between games is simplified using the easy to navigate side bar which allows players to filter game types, and pre-select favourite tables. This allows players to quickly place bets and repeat bets without having to change between tables.

Seamless Integration

Qorex Terminals can be used in-conjunction with all TCSJOHNHUXLEY Roulette Wheels (Mark VII, Saturn, Saturn Auto) and Dice Shakers. The terminal can also be used with 3rd Party Roulette Wheels and Card Shoes meaning existing equipment can be used without having to invest in new additional equipment. A wide variety of Player Tracking Systems, SAS Systems and Note and Ticket Printers can be incorporated offering flexibility for operators who have mixed estates.

Wide Range of Accessories

Qorex Terminals offer a wide range of accessories that allow for further customisation including ergonomically designed player shelves that double as spacers for in-between terminals and feature the same LED lighting, providing a seamless look. Further player features include wireless chargers for mobile devices along with drink holders to prevent spillages.

Let's get technical
