

AccuLevel and TriLevel

What sets TCSJOHNHUXLEY's AccuLevel and TriLevel apart?

AccuLevel and TriLevel from TCSJOHNHUXLEY is a quick and easy solution that enables a single member of casino staff to quickly level and rotate wheels on a regular basis to allow for optimal and fair game-play.

Features and Benefits

Fast, easy and accurate wheel levelling

Increases security by eliminating any drop zone bias caused by poor wheel calibration and lack of preventative maintenance

Eliminates the need to lift and level heavy Roulette Wheels

Reduces maintenance costs – can be set-up by one individual

Wheel can be rotated without the need to re-level

Rotation can be done at any time

Optional TriLevel solution provides a quick and accurate levelling check

Increased Security

An unlevel Roulette Wheel has the potential to generate a drop zone simply by being at an angle of 0.25 degrees, approximately equal to the thickness of a gaming chip. By actively rotating wheels, casinos of all sizes can reduce the risk of operating with predictable drop zones. Wheels should be rotated on a regular basis to reduce wear points and extend the life of the wheel. With AccuLevel, rotating can also be carried out without the need to re-level or remount electronic winning number reading devices.

Optional TriLevel Check

The TCSJOHNHUXLEY TriLevel is specifically designed to sit in the ball track of the wheel, enabling a single member of casino staff to quickly and accurately check and adjust the level of the wheel. The TriLevel is an optional extra to the Acculevel solution, enabling maintenance staff to level and rotate their wheel easily and on a regular basis to allow for optimal and fair game-play.

Rotate and Level Wheels with AccuLevel

AccuLevel from TCSJOHNHUXLEY is a quick and easy solution that enables a single member of casino staff to quickly level and rotate wheels without the need to adjust other devices connected to the wheel such as Winning Number Displays. AccuLevel is simple to install and works by placing the plate underneath the wheel so that the disc fits exactly to the inner edge of the routed groove.

Easy to Operate

AccuLevel allows easy and accurate three point levelling and features 360 degrees wheel plate rotation with 15 indexed positional locking points. AccuLevel's design reduces the potential risk of injury from lifting and levelling heavy Roulette Wheels.
